SUMMARY

- Full-stack developer building scalable web applications with JavaScript and Supabase. Skilled in responsive design, UI/UX development and backend integration with PostgreSQL. Comfortable architecting solutions from scratch and working through AI-assisted development workflows, with a strong focus on clean, maintainable and secure code. Proven track record delivering production-ready applications and shipping a full security product during a professional internship.

EXPERIENCE

- OffSecDiary** Remote
Software Development Intern, R&D Jun. 2026 – Aug. 2026
 - Katana Vault:** Built and shipped a zero-knowledge encrypted password manager solo, end to end. Includes a Chrome extension (MV3), backend, database, and a full website with marketing, self-service signup, company admin portal and superadmin portal.
 - Encryption:** Implemented client-side AES-256-GCM vault encryption with PBKDF2 key derivation and an RSA-2048 application-layer request tunnel on top of HTTPS so vault data stays encrypted end to end.
 - Recovery:** Built biometric facial account recovery with liveness detection and designed the full forgot-password and account recovery flow from scratch.
 - Payments:** Integrated Razorpay covering order creation, checkout, signature verification and webhooks, supporting multiple subscription tiers with role-based access control.
 - Security:** Found and fixed a payment plan-escalation vulnerability and a NoSQL injection risk. Added rate limiting, CSP hardening, hashed session tokens and fail-closed startup checks.
 - Documentation:** Authored complete technical docs covering architecture, API reference, database schema, security considerations and deployment roadmap.
- Real Gods eSports** Remote, India
Frontend Developer & Sponsorship Manager Oct. 2025 – Present
 - : Developed and maintained a responsive website using HTML5, CSS3 and JavaScript for event updates and community engagement.
 - : Managed end-to-end sponsorship workflow for 5+ brand partnerships, from outreach to website integration.
 - : Improved overall user experience through UI/UX enhancements and site performance optimizations.
- Real Gods eSports** Remote, India
Organisation Manager Nov. 2022 – May 2023
 - : Managed multiple Valorant roster line-ups, handling player coordination, scheduling and tournament registration.
 - : Oversaw team logistics and communication between players, managers and event organizers.
 - : Led team to 4th & 3rd place Nodwin Cups, #1 Vision Week qualification and Red Bull Qualifier finishes.

PROJECTS

- Pathified** | pathified.vercel.app | GitHub: AI-powered CS career guidance app featuring a 25-question adaptive quiz with real-time personalized career recommendations. Built with React, Groq API and Supabase; deployed on Vercel.
- IronForge Fitness** | forgeiron.vercel.app | GitHub: Responsive gym landing page with smooth scroll animations and mobile-first design. Built with React 18, Vite, Tailwind CSS and Framer Motion; deployed on Vercel.
- LPU WiFi Extension** | GitHub: Browser extension streamlining LPU campus network login and connectivity, removing manual steps for daily network authentication. Built with HTML5, CSS3 and JavaScript.

RESEARCH & PATENTS

- Patent (Co-inventor):** DBMS Predictive Execution — co-inventor/applicant with Anant Kumar on a database predictive-execution patent initiative. Research area: database systems, predictive execution and applied computing.

SKILLS SUMMARY

- Languages:** JavaScript (ES6+), Python, C, HTML5, CSS3
- Backend & Database:** Supabase, PostgreSQL
- Tools & Platforms:** Git, GitHub, Vercel, Netlify, VS Code, Chrome Extension (MV3)
- Concepts:** UI/UX Development, Responsive Design, Zero-Knowledge Architecture, REST APIs, Role-Based Access Control
- Workflow:** AI-Assisted Development, Prompt Engineering, Architecture Validation, Technical Documentation
- Familiar (AI-assisted):** React.js, Tailwind CSS, Framer Motion, Node.js, Express, MongoDB

EDUCATION

- Lovely Professional University** Phagwara, Punjab
B.Tech, Computer Science & Engineering; CGPA: 8.2 / 10 2025 – 2029
